

# ELECTRIC VEHICLE CHARGING

## FAST

EV fast chargers use higher voltages and are able to charge vehicles up to 10 times faster than a standard 120V wall outlet. ERMCO can evaluate your installation requirements and help select a charging station that meets your needs from the options available from multiple manufacturers.

## CONNECTED

Business owners that offer EV chargers for public use will want to have their chargers wirelessly connected, so drivers can find and access their charging locations. ERMCO's in-house technology systems experts can provide recommendations and installation solutions for network connectivity as well as security and lighting needs.

## TURNKEY

Having installed hundreds of fast chargers, ERMCO has the experience and knowledge necessary to provide an efficient, cost-effective turnkey solution for your EV charging station installations. In addition to our electrical power, lighting, and technology systems services, our installation solutions include your desired brand of charger and any additional services required such as excavation, concrete and mechanical.

# ELECTRIC VEHICLE CHARGING

## The future is **ELECTRIC**

By 2030, over half of the cars on our roads are likely to be electric. Drivers will need convenient access to charging stations at home, at work, and along the way, to recharge their electric vehicles (EVs).

Whether you're evaluating EV charging for personal use, to provide convenient charging access for your employees, or to provide options for public use, ERMCO can help. Our experienced staff and technicians collaborate with you on EV charging station selection and installation solutions. You get an experienced partner and a turnkey EV charging solution.

## OUR SERVICES INCLUDE:

- Evaluation of installation requirements
- Determination of needed capacity and infrastructure upgrades
- Experienced recommendations on charging station options
- Technology systems solutions for:
  - » Wireless network connection
  - » Security systems
  - » Lighting systems and controls
- Turnkey management of any additional services required for installation
- On-demand services for immediate or emergency needs
- Regularly scheduled and preventative maintenance services
