# DATA ENGINEER

ERMCO's Data Engineer plays a key role in transforming raw data into valuable insights that drive smarter decisions. They design, build, and maintain the data infrastructure that keeps our business running efficiently—developing scalable data pipelines, optimizing performance, and ensuring data is accurate, accessible, and secure. Whether integrating data from multiple sources or automating processes for efficiency, the Data Engineer helps turn information into action.

## IF YOU ARE:

- ✦ Organized and detail-oriented – taking pride in ensuring data accuracy and integrity.

- ✦ A quick learner and tech-friendly – staying up to date with the latest data technologies and industry trends.

- ✦ Security-minded – understanding the importance of data protection

- ✦ Motivated by efficiency – constantly looking for ways to optimize processes and automate repetitive tasks.

- ✦ A good problem solver – you enjoy digging into data challenges and finding creative solutions.

## AND YOU:

- ✦ Enjoy collaboration - working with team members and stakeholders to understand and meet their data needs.

- ✦ Like variety – each day is different with new opportunities

- ✦ Communicate effectively – able to break down technical concepts for non-technical audiences and translate business needs into data solutions.

## BENEFITS OF BECOMING AN ERMCO DATA ENGINEER

A great team – work alongside experienced account managers, administrators, electricians, and technicians.

Comprehensive and ongoing training to help you succeed in your career.
