

BUILDING CONTROLS & AUTOMATION

When an off-the-shelf building management system (BMS) won't provide the high-functioning capability you need, ERMCO can help develop a custom, integrated BMS solution that allows you to achieve your energy and operational efficiency goals.

SMART BUILDINGS & SMART SYSTEM MANAGEMENT

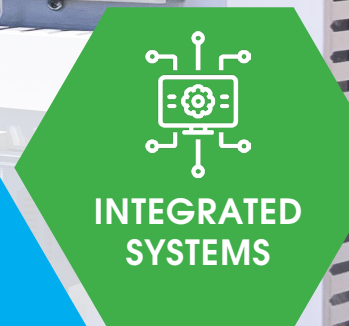

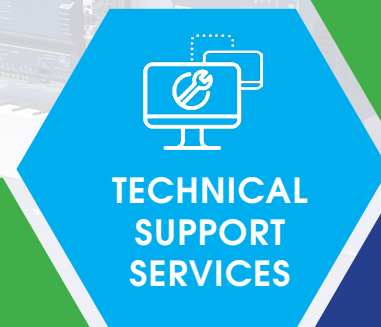

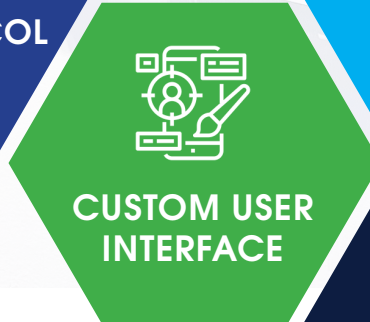

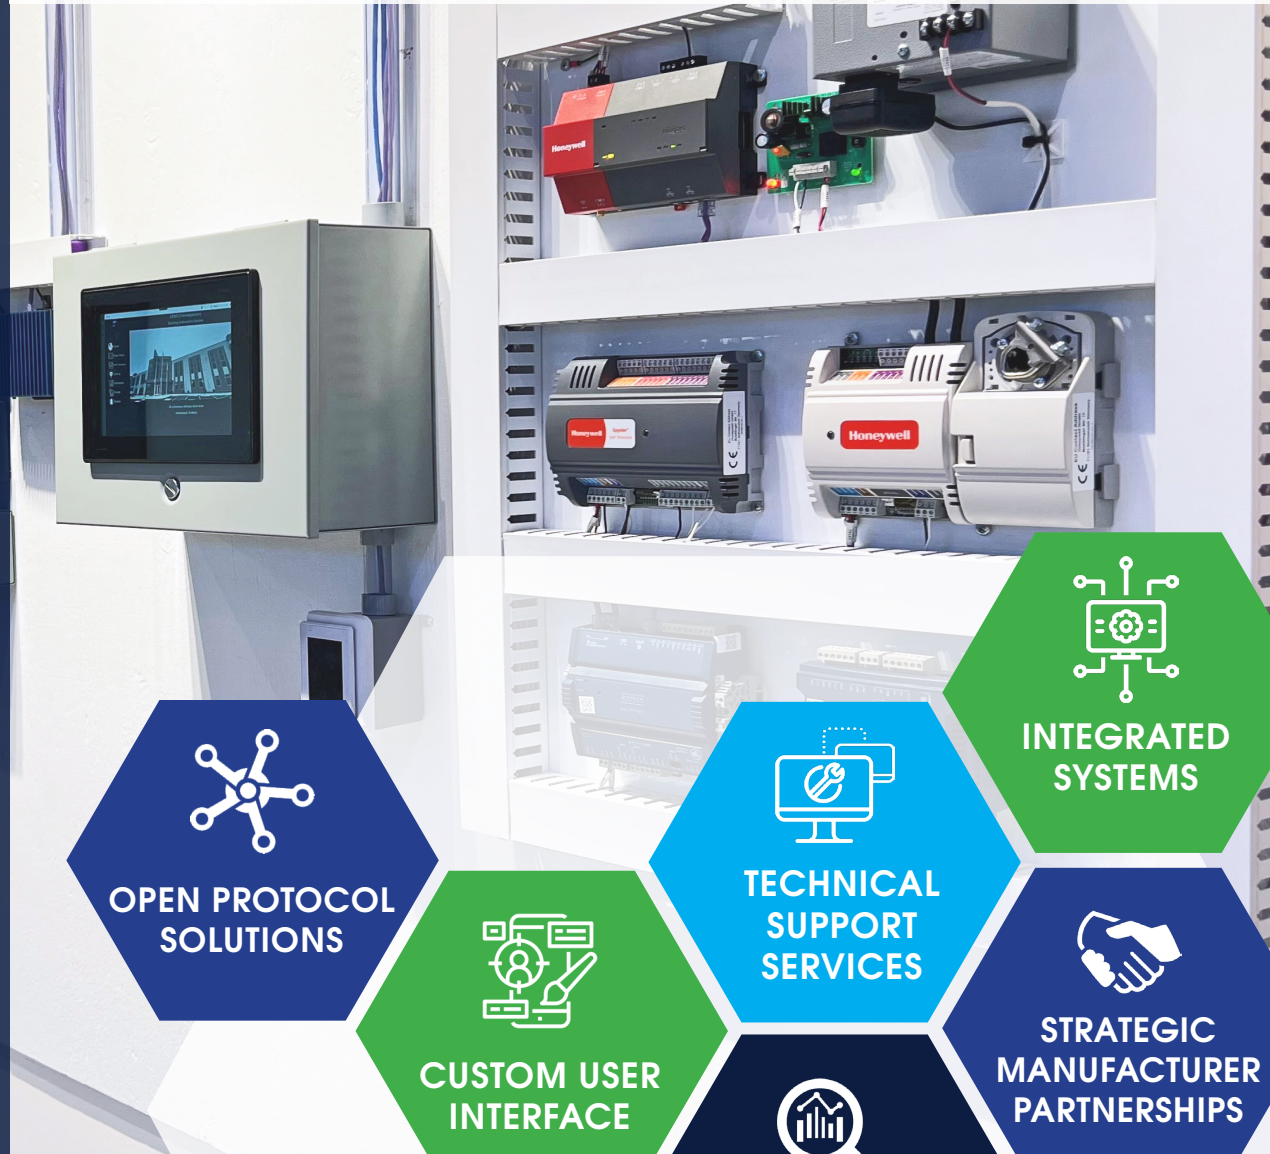

We start by helping you investigate interoperability options and choosing the right control devices and systems to meet your facility management needs. You can create a "smart building" experience with the ability to manage and monitor your facility from one integrated, web-based platform.

OPEN PROTOCOL SOLUTIONS & INTEGRATION

ERMCO uses open protocol solutions that integrate with any device that has communication capabilities, regardless of manufacturer brand, including lighting, environmental (HVAC), fire alarm, access, CCTV, A/V, and shade controls. We create custom, enhanced graphics and reporting tools designed to meet each client's unique needs. You get a user-friendly, intuitive interface that enables improved decision making by building operators and occupants.

TECHNICAL SUPPORT & MONITORING

Managing and maintaining your building's systems is key to proper performance and to maximizing lifecycle. ERMCO offers in-house technical support services, including remote monitoring and troubleshooting, planned maintenance, alarm response and management, and trend analysis. Technical support is available 24/7 with on-call field engineers and electricians ready to help.

DESIGN | INTEGRATE | INSTALL | MAINTAIN | MONITOR

BUILDING CONTROLS & AUTOMATION

OUR SERVICES INCLUDE:

DESIGN AND ENGINEERING

- Investigate manufacturer and interoperability options
- Develop strategies that address your building needs
- Develop an easy-to-use BMS solution
- Create custom user interface and graphics with the information you want displayed

INSTALLATION

- Experienced electricians and technicians perform installation and start up

TRAINING

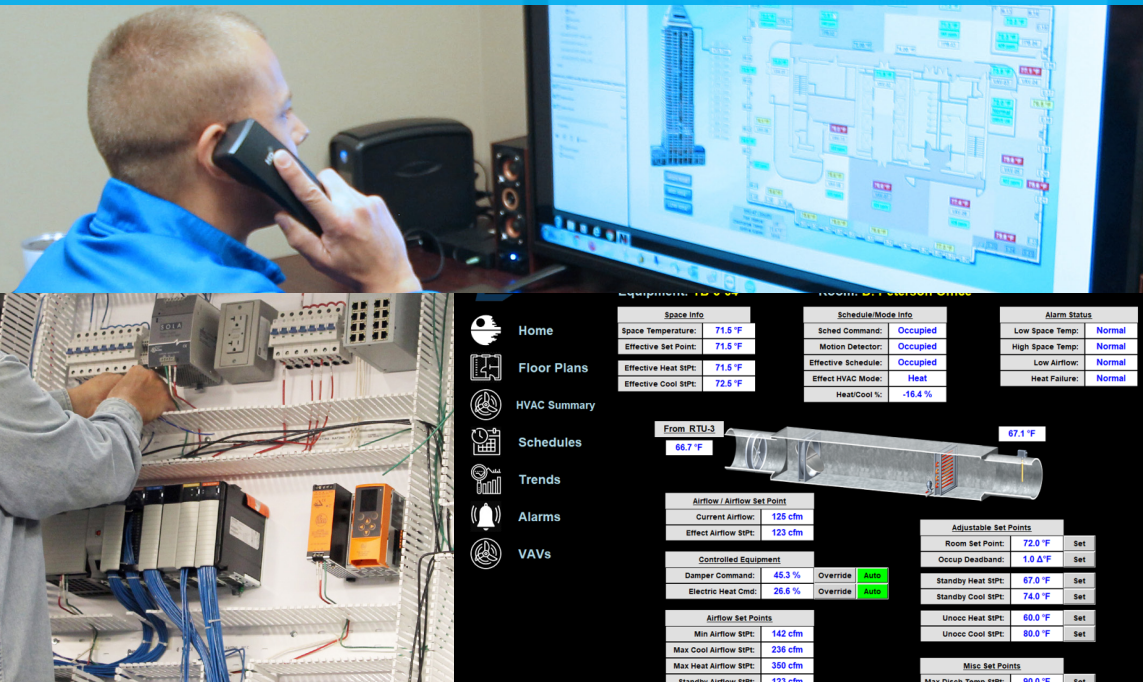

- Onsite training and support for BMS users

MAINTENANCE

- Maximize equipment and control systems' lifecycle with preventative, planned maintenance

TECH SUPPORT

- Remote monitoring
- Alarm response and management
- Trend analysis

As a full-service automation, systems, and electrical contractor, ERMCO works with clients to develop and maintain their building management systems throughout the lifecycle of their facility; from design, engineering, and installation, to preventative maintenance and ongoing technical support. With over 500 skilled electricians and technicians, we are also able to provide support for any of your audio-visual, security, low voltage, or electrical needs.

With the ERMCO team, you get:

25+YRS

Average experience of ERMCO team members.

570+

Certified, trained, local full-time electricians & technicians

24/7

Technical support options for onsite service, maintenance and 24/7 remote support
