LOGISTICS

ERMCO, Inc. has been in business since 1962, growing from a small electrical repair and maintenance company into a top national electrical and systems contractor.

Behind every ERMCO project is a team of talented project managers, engineers, estimators, technicians and craftspeople supported by a network of friends in IT, marketing, accounting, and more.

Our team members work together to serve our clients, grow as professionals and improve our world.

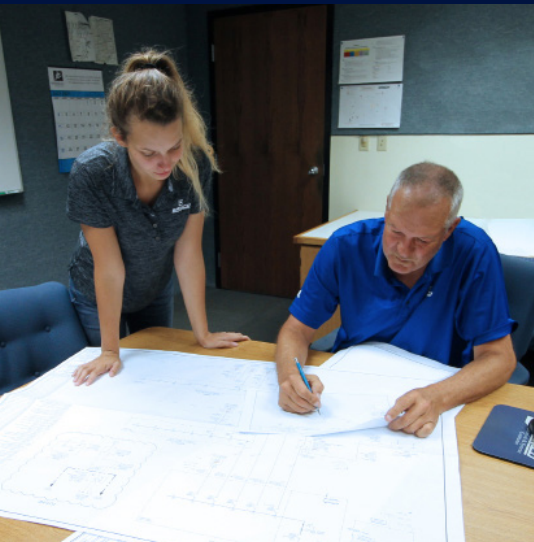

EMPLOYEE OWNED ERMCO is an employee-owned company, which means every employee is personally invested in making sure the company succeeds. We do that by making sure our clients, our partners and our colleagues succeed.

We're more than just an electrical contractor. ERMCO also provides services for:

- Design and installation of technology, low voltage and structured cabling systems
- Design and installation of automation, building access and temperature controls systems
- Pre-construction design-assist and design-build
- Virtual design and construction support services including modeling, management, scheduling and estimating
- Fabrication coordination and production
- Regular maintenance and emergency services
- Residential and generator services

TOP WORKPLACES
ERMCO was named a Top Workplace eleven years in a row.
