

INTRODUCING THE

# DEMONSTRATION CENTER

INNOVATING THE WAY YOU MAKE DECISIONS

# HANDS ON SOLUTIONS

FOR YOUR ELECTRICAL, SYSTEMS AND AUTOMATION NEEDS

When it comes to your building systems, there are many manufacturers and a wide variety of features to choose from. These components are typically installed inside walls, above ceilings, or behind locked doors, making it difficult to get hands-on when exploring options.

The ERMCO Demonstration Center showcases integrated technology options for automation, security, and audio-visual as well as commercial and residential electrical services. Clients are able to observe and test different options alongside our team to select what makes sense for their building and budget.

EMPOWERING PEOPLE | INSPIRING INNOVATION
